

# Hungarian Cluster Alliance

## Prestige. Value. Expertise.

Clusters are professional communities of excellence from different industries. Our members are micro, small and large enterprises, universities, research centres, municipalities, which proactively follow their path to the future and believe that they can grow faster in a strong, supportive community.

Our managements provide services to enhance the competitiveness of the cluster members and also the economic ecosystem. With our network of national and international contacts, our wide range of project activities and our experts with outstanding experience in their industries, we are able to support innovation in Hungarian companies in line with European trends, thus fulfilling our role as an economic cornerstone.

Cluster membership is a filter that is synonymous with business reliability and professional excellence.

The Hungarian Cluster Association aims to showcase the business and technological value that clusters provide. Learn about our cross-sectoral cluster network and our expert pool, where we work every day to support Hungarian businesses.
